

Piano: spessore 20 mm, sagomato, disponibile in:

- pietra lavica, con polvere di vetro colorato riciclato fuso in cottura, nei colori Cappuccino, Celadon, Ruggine e Verde;

- Pietra del Cardoso, spazzolato a grana fine. Il piano in pietra viene sottoposto ad un trattamento antimacchia, che tuttavia non ne garantisce la totale protezione. Sottopiano strutturale in HPL nero opaco, spessore 18 mm.

Base: in acciaio inox verniciato nel colore previsto per il piano, con finitura lucida anti-touch.

N.B.: quando il piano è in Pietra del Cardoso, specificare il colore desiderato per la base.

La struttura è dotata di piastre contrappeso interne di acciaio inox. Piedini regolabili in ABS e scivolante protettivo in gomma centorighe nera.

Top: 20 mm thick, contoured, made of:

- lava stone, with recycled coloured glass dust, cast and kiln fired, in Cappuccino, Celadon, Rust or Green colour;

- Pietra del Cardoso stone, fine-grain brushed. The top is then given a stain-resistant treatment which does not, however, guarantee total stain protection.

Structural underpanel in matt black HPL, 18 mm thick.

Base: in stainless steel glossy varnished with anti-fingerprint finish, in the same colour to match the top.

N.B.: when the top is in Pietra del Cardoso, specify the desired colour for the base.

Structure contains stainless-steel internal counterweights. Adjustable feet in ABS and protective glides in black ribbed rubber.

Tischplatte: Stärke 20 mm, formgeschnitten, aus:

- Lavastein, mit Pulver aus recyceltem Buntglas, das beim Brennen geschmolzen wird, Farben Cappuccino, Celadon, Rostbraun und Grün erhältlich;

- Pietra del Cardoso, feinkörnig gebürstet. Der Stein wird mit einem Fleckenschutz imprägniert, der aber keine volle Versiegelung garantiert. Tragende Unterplatte aus HPL in Mattschwarz, Stärke 18 mm.

Basis: aus Edelstahl mit glänzender Anti-Fingerprint-Lackierung in der gleichen Farbe wie die Tischplatte.

N.B.: wenn die Platte aus Pietra del Cardoso ist, geben Sie bitte die gewünschte Farbe der Basis an. Das Gestell verfügt über interne Platten aus Edelstahl als Gegengewicht.

Höhenverstellbare Füße aus ABS mit Schutzgleiter aus schwarzem geriffeltem Gummi.

Plateau : 20 mm d'épaisseur, façonné, fabriqué en :

- pierre de lave, avec de la poudre de verre coloré recyclé, fondu lors de la cuisson, dans les couleurs cappuccino, celadon, rouille ou vert;

- Pietra del Cardoso, brossée grain fin. Le plateau en pierre est sujet au traitement anti-tache, qui toutefois ne garantit pas une protection totale. Sous-plateau structurel en HPL noir mat, 18 mm d'épaisseur.

Base : en acier inoxydable avec une finition brillante anti-trace assortie à la couleur du plateau.

N.B. : lorsque le plateau est en pierre de Cardoso, spécifiez la couleur souhaitée pour la base.

La structure est équipée de plaques de contrepois internes en acier inoxydable. Pieds réglables en ABS et patins glisseurs en caoutchouc milleraie noir.
